

Regulation-based eLearning enhances safety and security by standardizing training and maintaining training records for airfield and SIDA area activities of airport employees.

The Interactive Training Center is a scalable, cloud-based subscription solution that provides FAA and TSA regulatory training to small hub airports with real-time record keeping and management reporting. The iTC™ offers airports an affordable method of providing staff and stakeholders consistent training with key features such as automatic recurrent training reminders. Training that is available 24/7 on any device allows the airport to meet tenants' staffing plans without undue interruptions or scheduling challenges.

Instructor-led courses can be time intensive including creation, updating, and class scheduling. The iTC™ provides airports an alternative to manual test scoring, cumbersome training record keeping, and inefficient audits. Professional curriculum designers develop eLearning based on adult learning principles and concepts while ensuring that content adheres to FAA regulation 49 CFR Part 139 or TSA regulation 49 CFR Part 1542.

CONVENIENCE

Training Anytime. Anywhere. Any Device

Expand training outside your training room walls and beyond 8 to 5. All training records are kept in one location for convenient searches, audits, and reports.

INTEGRATION

Open API

Allows for integration to the airport's credentialing system in real time. This technical solution eliminates double, sometimes even triple, data entry requirements and automates previously manual processes.*

CONVENIENCE

> 50 Safety and Security Courses

Airports receive training and record keeping compliance through 5 Core Courses: **SIDA, Movement Area Driver, Non-Movement Driver, Airport Worker Security Awareness, and Authorized Signer.**

INTEGRATION

Service Excellence³

Clients receive personalized attention from SSi staff so that your requests for updates, upgrades, or additional modules are met quickly and courteously.

ABOUT US

Since 2004, SSi has become the leading provider of safety and security training, and regulatory compliance consulting services to the aviation industry. Our market advantage is simply developing the most affordable, comprehensive and appropriate programs to meet our client needs.

*Integration of the iTC™ with an approved integration partner is an additional cost.
